Dear :

(Patient Name) _____ has been diagnosed with [DIAGNOSIS] and ICD10CM _____ and will start chemotherapy treatment on (Date). I am writing on behalf of the patient to document medical necessity for Paxman Scalp Cooling therapy for the prevention of chemotherapy-induced hair loss due (ICD L65.9) to [DIAGNOSIS] _____ and ICD10CM _____. The PAXMAN Cooling System, is a FDA cleared device (DEN150010) and is used to reduce the likelihood of chemotherapy-induced alopecia. The treatment regimen with the Paxman Cooling system is to use it before (30 minutes prior), during the IV administration of chemotherapy, and after (90-120) minutes after chemotherapy has been discontinued). The Paxman Cooling System requires direct supervision and utilizes a patient-specific cooling cap preloaded with the number of cooling cycles that corresponds to the number of times the patient will receive chemotherapy. (Patient Name) _____ has been prescribed (Number) ____ of chemotherapy administrations and will require (Number) ____ of preloaded cooling cycles.

Systematic reviews and meta-analyses have demonstrated a statistically significant reduction in hair loss^{1,2}. The studies reviewed and reported on in the medical literature have included randomized controlled trials and; prospective single arm/historical control trials. The vast majority of these peer reviewed articles have demonstrated a positive effect of scalp hypothermia in reducing hair loss; no matter the type of scalp hypothermia system used. When combining these studies for meta-analysis purposes, the effect is statistically significant, favoring scalp hypothermia's ability to minimize hair loss. Reducing the incidence of hair loss during chemotherapy for cancer minimizes hair loss's effect on a patient's anxiety, distress, depression, negative body image, and; lowered self-esteem^{3,4}. Thus minimizing hair loss is an important consideration in light of the patient's condition. Recently there were two US prospective studies that also demonstrated the beneficial effects of scalp cooling^{4,5}.

Please contact us with any questions at (Phone Number) _____ or Email _____.

Sincerely,
